

FIRE CUTS ARE OUT OF CONTROL

The proposals will mean:

- The removal of West Hartford's on call fire engine
- The loss of 24 firefighter posts
- The closure of Haydon Bridge Fire Station and the loss of its fire engine
- The removal of two fire engines and reduction in response ability through the down-sizing of further appliances and reduction in crew sizes responding to incidents will place the public of and vistors to Northumberland, together with the firefighters that work to protect our communities at greater risk.
